Election/Restrictions

1. Applicant's election of Group I, specie D in the reply filed on 4/14/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 1, 25 and 38 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 3, 5, 34-36, 52 and 59, directed to the species of A-C and E are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Information Disclosure Statement

3. The information disclosure statement filed 4/5/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

4. The disclosure is objected to because of the following informalities: there are numerous misspellings throughout the specification. The word "figure" has been spelled

Art Unit: 3754

"figur" on at least pages 11, 12, 13, 19, and 24. Please check the entire specification for minor errors.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-65 and 70-77 are allowed.

With regards to claims 1-65, the first and second controls for the valve and pressurized fluid source, in combination with the other claimed elements, are not found in the prior art. With regard to claims 70-77, the hand-operated air pump, in the environment of the caulk-type gun, in combination with the other claimed elements, is not found in the prior art.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

See paragraphs 3 and 4 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huber et al., Hoagland, and Lofstrand, Jr. show other air actuated dispensing guns; Rieck shows a rotary valve; and Craig shows a hand pump on a dispenser.
